TABLE OF CONTENTS

Page

LIST OF FIGURES viii

Chapter 1: Introduction 1

1.1 Background 2

1.2 Previous Work 3

1.3 Overview of This Research 4

1.4 Contents of This Paper 6

Chapter 2: Four Dimensional Geometry 7

2.1 Vector Operations and Points in Four-Dimensional Space 7

2.2 Rotations in Four Dimensions 12

Chapter 3: Overview of Visualization in Three and Four Space 14

3.1 Viewing in Three-Space 14

3.2 Viewing in Four-Space 19

Chapter 4: Wireframe Display of Four Dimensional Objects 21

4.1 High-Level Overview of 4D to 2D Projection 21

4.2 Description of 3D to 2D Projection 22

4.3 Description of 4D to 3D Projection 29

Page

4.4 Rotations of 4D Wireframes 38

4.5 User Interaction and Visualization Aids 39

4.6 Example 4D Wireframe Images 40

Chapter 5: Raytracing in Four Dimensions 56

5.1 General Description of the Raytracing Algorithm 56

5.2 Generating the Four-Dimensional Ray Grid 59

5.3 The General Raytrace Algorithm 62

5.4 Reflection and Refraction Rays 63

5.5 Illumination Calculations 66

5.6 Intersection Algorithms 69

5.6.1 Ray - Hypersphere Intersection 69

5.6.2 Ray - Tetrahedron Intersection 72

5.6.3 Ray - Parallelepiped Intersection 77

5.7 Display of 4D Raytrace Data 78

5.8 Example Ray4 Images 79

Page

Chapter 6: Conclusion 83

6.1 Research Conclusions 83

6.2 Future Research Areas 84

References 86

Appendix

A. Implementation Notes 88
